

Can your filters handle this?

**Perfection in continuous operation:
MANN-FILTER for agricultural machines.**

OE quality filters

MANN-FILTER solutions for your agricultural machine

Whether for tractors, combine harvesters or forage harvesters: Filters for agricultural machines operate under the harshest conditions and – particularly during the harvesting season – are in constant use. The challenges here are the large amounts of dust and organic particles, as well as the enormous mechanical loads. Our products are synonymous with optimal protection for your machine, long service life and OE quality, because MANN+HUMMEL is a long-standing development partner of the most renowned agricultural machine manufacturers worldwide.

Performance that pays

Our expertise is unique: Modern combustion engines in agricultural machines require OE-quality filter technology of particularly high performance. This is where our many decades of experience in the development, construction and application of efficient, high-performance filter solutions come in. The leading manufacturers of agricultural machines place their trust in our first-class products – conclusive evidence for the outstanding performance of MANN-FILTER.

A service that is second to none.

You can rely on our support: The best possible availability and short delivery times are standard for us – as is our comprehensive After Sales Support. Our customers also benefit from our state-of-the-art information tools, including the handy MANN-FILTER app for smartphones and tablets, the online catalog, as well as our easy-to-navigate catalogs provided on CD-ROM and in printed form.

A range with strength and depth

Comprehensive offerings: Whether you are looking for air, oil, fuel, cabin air or hydraulic filters – in terms of its range and market coverage for all common agricultural machines MANN-FILTER is one of the leading suppliers. We supply compatible filters for almost every manufacturer and model.

With MANN-FILTER you are always perfectly equipped

The best choice: As a sought-after supplier for agricultural machines, we always deliver outstanding quality – not just for basic equipment, but also when it comes to replacement requirements for maintenance and service. When you choose quality products from MANN-FILTER you benefit in three ways – by complying with the service intervals prescribed by the machine manufacturers, reducing machine downtimes and ensuring long-term protection of your investment. Because long machine running times and optimum protection are not only good for your machine but also for your budget.

MANN-FILTER – benefits that pay

- ⊕ Consistently proven OE quality
- ⊕ Extensive range
- ⊕ High availability, fast delivery
- ⊕ Maximum safety, reliability and durability
- ⊕ Comprehensive service
- ⊕ More than 75 years of filter expertise for vehicles and combustion engines

Everything
at a glance!

you can
trust!**

Our products in detail

The service life and efficiency of agricultural machines also depend on the functional reliability of the filters. Do not accept compromises and choose MANN-FILTER for OE quality. We constantly test our products in accordance with international industry standards in our own test facilities.

Air filters

Ideal protection against dirt intake: You think that large volumes of dust and long operating times are mutually exclusive? We think otherwise and our air filters are proof that the opposite is true. The high dust-holding capacity ensures long and efficient machine running times. With high-quality air filters from MANN-FILTER our customers save a lot of money.

Oil filters

Keep everything running smoothly: Oil filters ensure the effective removal of contaminants from oil circuits. Clean oil reduces friction in bearings, lubrication gaps and moving parts and reliably extends the service life of the engine.

Fuel filters

Maximum performance without the risk of engine failure: Reliable protection for sensitive components means that dirt particles and water are reliably removed, thus preventing wear and corrosion.

Hydraulic filters

Long service life as standard: In environments with high operating pressures our filters protect the hydraulic system of your machine against dirt particles, corrosion, and abrasion. The high-dirt holding capacity of the medium ensures a long filter service life. Even the tiniest of particles are reliably removed with hydraulic filters from MANN-FILTER.

Multichannel access

The online catalog

With more than 4,600 different filter elements to choose from, finding the right product can be a challenge. The MANN-FILTER online catalog will quickly help you find the right product. A 360-degree view is available for many of our filters. And with your smartphone you have access to a handy pocket-sized version of our catalog – always available when you need it and always up to date.
