

**MANN  
FILTER**

**Ready for ultimate solution.  
MANN-FILTER for compressors.**

**MANN  
FILTER**

**MANN-FILTER - Perfect parts. Perfect service.**

# Ready for any project.

## Rely on yellow and green when selecting filters.

Dust, long running times, high mechanical loads – these are the challenges that filtration solutions for compressors on construction sites and in industrial enterprises have to handle. MANN-FILTER products are made precisely for these requirements and offer the best protection for your compressors. The name MANN-FILTER stands for 100 % original equipment quality – and MANN+HUMMEL is a development partner to all major compressor manufacturers.

### Quality that you can depend on

**Reliable filtration chain:** Air filters, oil filters, and air/oil separators are team players that interact with one another in a compressor. With high-performance MANN-FILTER filter elements, you can rely on a filtration chain in 100 % original equipment quality.

### A range that offers everything

**Comprehensive and high-quality:** MANN-FILTER offers you a complete range of air, oil, and fuel filters, as well as air/oil separators of the highest quality and durability for use in compressors from the most-important major manufacturers.

### Service that impresses

**Always in good hands** – from ordering to support: High availability and fast delivery of our products come as standard – together with our comprehensive After Sales services. And with our state-of-the-art information tools including our website, online catalog, and print catalogs, you can find what you're looking for in no time at all.

### An investment that pays

**Benefit in three ways:** With high-quality products from MANN-FILTER, you comply with the service intervals prescribed by machine manufacturers, reduce machine downtimes, and ensure long term protection of your investment. Because long running times and optimum protection are not only good for your machine, but also for your budget.

---

## Top 5 reasons to choose MANN-FILTER

---

- +** Safety and reliability, even under the heaviest loads
- +** Original equipment quality
- +** Best market coverage in Europe
- +** Comprehensive service
- +** Original equipment expertise for over 70 years

Everything  
at a  
glance!

# MANN-FILTER – always the right choice.

Whether mobile on construction sites or stationary in industrial plants, compressors must always deliver full power. Long running times, large volumes of dust and high mechanical loads place enormous demands on filtration systems. MANN-FILTER products in 100% original equipment quality offer the best protection for your compressor, providing long-term protection for your plant and therefore your investment.

## Air Filter

Reliable performance even in dusty working environments: MANN-FILTER air filters impress with their excellent filtration performance. They separate harmful dirt particles and water droplets from the intake air, thus reducing engine wear and extending its service life. Where technically possible, we use environmentally friendly, metal-free elements in our filters.

## Oil Filter

The exceptionally high particle separation and dirt holding capacity of MANN-FILTER oil filters ensure the best possible protection and enable long service intervals – even under the toughest operating conditions.

## Fuel Filter

MANN-FILTER fuel filters protect modern diesel injection systems against dirt particles and water droplets in the fuel. They reliably ensure that the engine is supplied with clean fuel – and thus contribute to extending its service life.

## Air/Oil Separator

Whether in element or box form, MANN-FILTER air/oil separators ensure high separation rates and low quantities of residual oil. This minimizes oil loss. The low differential pressure delivers energy savings. This reduces operating costs and conserves resources.
