

# MANN-FILTER Product Information

Issue no 067

Date: 11.07.2011

## Information on MANN-FILTER WK 6002

The design of MANN-FILTER fuel filter WK 6002 has been changed. From production date 10/2010 onwards, MANN-FILTER WK 6002 (previously WK 612/1) has been produced in a different material. This one, like the OES part from Renault, is in plastic. The difference in appearance from the previous design can be seen in the picture below.

Naturally the filter continues to meet the vehicle manufacturers' specifications and be used in the vehicles listed in our current MANN-FILTER catalogue or our online catalogue under [www.mann-filter.com](http://www.mann-filter.com).

*current design WK 6002*

*previous design WK 612/1*
